INDEX TO SUBJECTS

A

Acetylcholine compartments, mouse diaphragm, effects of black widow spider venom, electrical stimulation, and potassium, bioassay and biochemistry and electrophysiology and EM, 716

Acetylcholinesterase and butyrylcholinesterase localization, cat superior cervical ganglion, cytochemical EM, 785

– distribution, mouse extraocular muscle, autoradiographic light and EM, 274

Actin content and organization, normal and transformed rat kidney cells, autoradiography and biochemistry and EM, 28

– filaments, cone contraction, teleost retina, EM, 227

– and microtubule interaction, role of microtubule-associated proteins, biochemistry and EM, 958

Adrenoleukodystrophy, human brain glial filaments, biochemistry and immunology and light and EM, 426

Aggregation, molecular, zymogen granules, ionic interactions between bovine chymotrypsinogen A and chondroitin sulfate, biochemistry, 951

Aging, cell cycle stages sensitive to oxygen, human diploid cells, autoradiography and cytospectrophotometry, 390

–, effect on hepatic fine structure, Fischer 344 rat, stereological light and EM, 319

Alga *Chlamydomonas reinhardii,* flagella, control of protein synthesis, autoradiography and biochemistry, 8

– *Fucus distichus,* embryo, fucoidin sulfation in rhizoid wall, fluorescence microscopy and immunology, 866

4-Aminopyridine, effect on in vitro gap junction formation, canine trachea smooth muscle, biochemistry and freeze-fracture EM, 338

Amniotic fluid, human, fibronectin synthesis in culture, biochemistry and immunology and light and EM, 701

Antheraea polyphemus, follicular cells, secretory kinetics during eggshell formation, biochemistry and autoradiographic light and EM, 131

Antibiotic production, plants, response to fungal oligosaccharides, host-pathogen interactions, review article, 627

Antigens, surface, HeLa cells, derivatized silica spheres as immunospecific markers, biochemistry and EM, 309

Astrocytes, human brain, adrenoleukodystrophy, glial filaments, biochemistry and immunology and light and EM, 426

Axon, giant, squid, neurofilament protein phosphorylation, biochemistry, R23

–, regenerating, differentiation of at original synaptic sites, basal lamina reinnervation, frog muscle, light and EM, 176

Axostyle, rotary, termite flagellates, laser microbeam study and EM, 76

B

Bacteroids, membrane envelope enclosing, soybean root nodules, biochemistry and cytochemical EM, 919

Basal lamina reinnervation, frog muscle, differentiation of regenerating axons at original synaptic sites, light and EM, 176

Birefringence, BHK-21 caps, 10-nm filaments, biochemistry and immunofluorescence and light and EM, 93

Blisters, membrane, particle-free, artefacts on glutaraldehyde-fixed chick corneal fibroblasts, freeze-fracture EM, 756

Bone marrow, rat, sialic acid distribution at endocytic sites of sinusoidal endothelium, cytochemical EM, 379

Brain, dog, holes in postsynaptic density, serial sectioning EM, 36

–, human, adrenoleukodystrophy, glial filaments, biochemistry and immunology and light and EM, 426

–, rat, synaptic vesicle membrane retrieval in synaptosomes, EM, 685

Butyrylcholinesterase and acetylcholinesterase localization, cat superior cervical ganglion, cytochemical EM, 785

C

Calcium ionophore-induced secretion of lysosomal enzymes, microfilaments and microtubules in, human polymorphonuclear leukocytes, biochemistry and EM, 769

– phosphate transport, intact and impaled giant mitochondria, mouse liver, physiology and Nomarski microscopy, 214

–, role in control of protein synthesis, *Chlamydomonas reinhardii* flagella, autoradiography and biochemistry, 8

–, role in Sendai virus-induced membrane fusion,

chicken erythrocytes, biochemistry and freeze-etch EM, 465
Calf, brain microtubules, interaction with actin, role of microtubule-associated proteins,. biochemistry and EM, 958
Caps, birefringent, BHK-21 cells, 10-nm filaments, biochemistry and immunofluorescence and light and EM, 93
Carbonic anhydrase, turtle retina glial (Müller) cells, biochemistry, 675
Cat, superior cervical ganglion, localization of acetylcholinesterase and butyrylcholinesterase, cytochemical EM, 785
Cell cohesion, species-specific, slime molds, fluorescence microscopy, 937
– communication and ovulation, cumulus-oocyte complex, rat ovarian follicles, biochemistry and physiology and light and freeze-fracture EM, 58
– cycle stages sensitive to oxygen, human diploid cells, autoradiography and cytospectrophotometry, 390
– membranes, sterol-digitonin complexes, biochemistry and freeze-fracture EM, 577
Cells, baby hamster kidney (BHK-21), birefringent caps, 10-nm filaments, biochemistry and immunofluorescence and light and EM, 93
–, chick embryo connective tissue, heavy meromyosin labeling of intermediate filaments, EM, 644
–, Chinese hamster, tyrosyltubulin ligase and colchicine binding, biochemistry, 441
–, glial (Müller), turtle retina, biochemistry, 675
–, HeLa, influenza virus surface antigens, derivatized silica spheres as immunospecific markers, biochemistry and EM, 309
–, HeLa S3, microtubules, in vitro polymerization of, biochemistry and EM, 47
–, HeLa S3, nucleus, chromatin-depleted, hnRNP fibers, autoradiography and biochemistry and EM, 663
–, human amniotic fluid, fibronectin synthesis, biochemistry and immunology and light and EM, 701
–, human diploid WI-38, oxygen-sensitive stages of cell cycle, autoradiography and cytospectrophotometry, 390
–, lymphoma BW 5147 line and toxin-resistant variant, dynamics of toxin and lectin receptors, cytochemistry and EM, 565
–, normal rat kidney and viral transformant, actin content and organization, autoradiography and biochemistry and EM, 28
–, PC12 pheochromocytoma, nerve growth factor requirement for cell survival, cytology, 747
–, rat pheochromocytoma, glucocorticoid induction of tyrosine hydroxylase, biochemistry, R1
–, secretory, venom gland, *Vipera palaestinae,* intracellular protein transport, biochemistry and autoradiographic light and EM, 488
–, 3T3-4 mouse fibroblasts, pinosome destruction, pinanhalysis, cytochemical and video light and EM, 480
Cells, Vero, patterns of peptide synthesis during growth, biochemistry and cytology, R28
Centrifugation, isopycnic, in metrizamide gradient, isolation of rat liver lysosomes, biochemistry and cytochemical EM, 349
Chick embryo cornea, glutaraldehyde-fixed fibroblasts, particle-free membrane blisters are artefacts, freeze-fracture EM, 756
– embryo fibroblasts, major cell surface glycoprotein, localization, redistribution, and role in cell shape, biochemistry and immunofluorescence and phase contrast microscopy, 520
Chicken, erythrocytes, role of calcium in Sendai virus-induced membrane fusion, biochemistry and freeze-etch EM, 465
Chironomus thummi, salivary glands, histone localization in polytene chromosomes, immunofluorescence, 910
Chlamydomonas reinhardii, flagella, control of protein synthesis, autoradiography and biochemistry, 8
Cholesterol-digitonin complexes, cell and liposome membranes, biochemistry and freeze-fracture EM, 577
Chondroitin sulfate and bovine chymotrypsinogen A, ionic interactions, biochemistry, 951
Chromatin-depleted nuclei, HeLa S3 cells, hnRNP fibers, autoradiography and biochemistry and EM, 663
Chromosomes, polytene, histone localization, *Chironomus thummi* salivary glands, immunofluorescence, 910
–, *Trichosia pubescens* salivary gland, induction of gene activity, autoradiography and histology, 1
Chymotrypsinogen A, bovine, and chondroitin sulfate, ionic interactions, biochemistry, 951
Cilia, somatic, *Paramecium tetraurelia,* ultrastructure of proximal region, freeze-fracture EM, 451
Cohesion, species-specific, cellular slime molds, fluorescence microscopy, 937
Colchicine binding and tyrosyltubulin ligase, Chinese hamster cells, biochemistry, 441
Cone contraction, thin (actin) and thick (myosinlike) filaments, teleost retina, EM, 227
– myoid elongation, microtubules, teleost retina, EM, 247
Connective tissue role in Schwann cell and nerve fiber interaction, rat sensory ganglia, light and EM, 943
Contraction-excitation uncoupling, frog skeletal muscle, electrophysiology, 782
Cornea, chick embryo, glutaraldehyde-fixed fibroblasts, particle-free membrane blisters are artefacts, freeze-fracture EM, 756
Cumulus-oocyte complex, cell communication and ovulation, rat ovarian follicles, biochemistry and physiology and light and freeze-fracture EM, 58

Cytochrome P450, localization of, rat liver microsomes, immuno EM, 503

D

Density, postsynaptic, holes in, dog brain, serial sectioning EM, 36
Diaphragm, mouse, acetylcholine compartments, effects of black widow spider venom, electrical stimulation, and potassium, bioassay and biochemistry and electrophysiology and EM, 716
Dictyostelium discoideum and *D. purpureum*, species-specific cohesion, fluorescence microscopy, 937
Differentiation, neuronal, PC12 pheochromocytoma cells, role of nerve growth factor, cytology, 747
Digitonin-cholesterol complexes, cell and liposome membranes, biochemistry and freeze-fracture EM, 577
Dog, brain, holes in postsynaptic density, serial sectioning EM, 36
–, trachea, smooth muscle, in vitro formation of gap junctions, effect of potassium conductance blockers, biochemistry and freeze-fracture EM, 338
Drosophila melanogaster, myoblasts, isolation from primary cultures of embryonic cells, autoradiography and cytology and EM, 856

E

Eggshell formation, silkmoth follicular cells, secretory kinetics, biochemistry and autoradiographic light and EM, 131
Electrical stimulation, effect on acetylcholine compartments, mouse diaphragm, bioassay and biochemistry and electrophysiology and EM, 716
Electron microscopy, glutaraldehyde-fixed fibroblasts, chick embryo cornea, particle-free membrane blisters are artefacts, freeze-fracture EM, 756
Elicitors, phytoalexin accumulation, plants, response to fungal oligosaccharides, host-pathogen interactions, review article, 627
Embryo, frog, cytoplasmic control of nuclear membrane breakdown, cytology, R15
–, *Fucus distichus*, fucoidin sulfation in rhizoid wall, fluorescence microscopy and immunology, 866
Endocytosis, rat neurohypophysis, membrane events during, freeze-fracture EM, 542
– and sialic acid distribution, sinusoidal endothelium of rat bone marrow, cytochemical EM, 379
Endoplasmic reticulum membranes, rat liver, localization of cytochrome P450, immuno EM, 503
– reticulum membranes, rat liver microsomes, biochemistry and cytochemistry and freeze-fracture stereological EM, 289
Endothelium, sinusoidal, rat bone marrow, sialic acid distribution at endocytic sites, cytochemical EM, 379
Envelope, membrane, enclosing bacteroids, soybean root nodules, biochemistry and cytochemical EM, 919
Envelope, nuclear, role in cellular distribution of nuclear polypeptides, frog oocytes, biochemistry and EM, 168
Enzyme, acetylcholinesterase distribution, mouse extraocular muscle, autoradiographic light and EM, 274
–, tyrosine hydroxylase, glucocorticoid induction of, rat pheochromocytoma cells, biochemistry, R1
–, tyrosyltubulin ligase and colchicine bindings, Chinese hamster cells, biochemistry, 441
Enzymes, acetylcholinesterase and butyrylcholinesterase localization, cat superior cervical ganglion, cytochemical EM, 785
–, lysosomal, human polymorphonuclear leukocytes, microfilaments and microtubules in calcium ionophore-induced secretion of, biochemistry and EM, 769
–, neurotransmitter, turtle retina glial (Müller) cells, biochemistry, 675
Erythrocytes, chicken, role of calcium in Sendai virus-induced membrane fusion, biochemistry and freeze-etch EM, 465
–, nucleated, nonmammalian vertebrates, marginal band system, light and EM, 260
Excitability, role of subaxolemmal filamentous network in, squid giant nerve fiber, biochemistry and scanning and transmission EM, 597
Excitation-contraction uncoupling, frog skeletal muscle, electrophysiology, 782
Exocytosis, rat neurohypophysis, membrane events during, freeze-fracture EM, 542
Eye, mouse, extraocular muscle, acetylcholinesterase distribution, autoradiographic light and EM, 274

F

Factor, maturation promoting, control of nuclear membrane breakdown, frog embryo, cytology, R15
–, nerve growth, requirement for cell survival, PC12 pheochromocytoma cells, cytology, 747
Fat body, silkmoth, protein granules and storage proteins, biochemistry and light and EM, 823
Fibers, hnRNP, chromatin-depleted nuclei, HeLa S3 cells, autoradiography and biochemistry and EM, 663
Fibroblasts, glutaraldehyde-fixed, chick embryo cornea, particle-free membrane blisters are artefacts, freeze-fracture EM, 756
Fibronectin, chick embryo fibroblasts, localization, redistribution, and role in cell shape, biochemistry and immunofluorescence and phase contrast microscopy, 520
– synthesis, cultured human amniotic fluid, biochemistry and immunology and light and EM, 701
Filaments, glial, human brain, adrenoleukodystrophy, biochemistry and immunology and light and EM, 426
–, intermediate, heavy meromyosin labeling of, cultured connective tissue cells, EM, 644
–, 10-nm, BHK-21 cells, birefringent caps, biochemis-

try and immunofluorescence and light and EM, 93
Filaments, subaxolemmal, role in excitability, squid giant nerve fiber, biochemistry and scanning and transmission EM, 597
–, thin (actin) and thick (myosinlike), cone contraction, teleost retina, EM, 227
Fish, teleost, retina, microtubules in cone myoid elongation, EM, 247
–, teleost, retina, thin (actin) and thick (myosinlike) filaments in cone contraction, EM, 227
Flagella, *Chlamydomonas reinhardii*, control of protein synthesis, autoradiography and biochemistry, 8
Flagellates, termite, rotary axostyle, laser microbeam and EM, 76
Follicles, rat ovary, cumulus-oocyte complex, cell-to-cell communication and ovulation, biochemistry and physiology and light and freeze-fracture EM, 58
–, silkmoth, secretory kinetics during eggshell formation, biochemistry and autoradiographic light and EM, 131
Formamide, excitation-contraction uncoupling, frog skeletal muscle, electrophysiology, 782
Frog *Rana pipiens*, muscle, basal lamina reinnervation, differentiation of regenerating axons at original synaptic sites, light and EM, 176
– *Rana pipiens*, skeletal muscle, excitation-contraction uncoupling, electrophysiology, 782
– *Rana pipiens* and *Xenopus laevis*, embryo, cytoplasmic control of nuclear membrane breakdown, cytology, R15
–, retina, membrane protein of outer segment disks, immunocytochemical EM, 415
– *Xenopus laevis*, oocytes, cellular distribution of nuclear polypeptides, role of nuclear envelope, biochemistry and EM, 168
Fucoidin sulfation, *Fucus* embryo, localization in rhizoid wall, fluorescence microscopy and immunology, 866
Fucus distichus, embryo, fucoidin sulfation in rhizoid wall, fluorescence microscopy and immunology, 866
Fundulus heteroclitis, retina, thin (actin) and thick (myosinlike) filaments in cone contraction, EM, 227
Fusion, membrane, Sendai virus-induced, chicken erythrocytes, role of calcium, biochemistry and freeze-etch EM, 465

G

Ganglion, superior cervical, cat, localization of acetylcholinesterase and butyrylcholinesterase, cytochemical EM, 785
Gap junctions, in vitro formation of, effect of potassium conductance blockers, canine trachea smooth muscle, biochemistry and freeze-fracture EM, 338
– junctions and ovulation, cumulus-oocyte complex, rat ovarian follicles, biochemistry and physiology and light and freeze-fracture EM, 58
Gap junctions, rat liver, changes in during regeneration, freeze-fracture EM, 554
Gene activity, induction of, *Trichosia pubescens* salivary gland chromosomes, autoradiography and histology, 1
Glial cells, turtle retina, biochemistry, 675
– filaments, human brain, adrenoleukodystrophy, biochemistry and immunology and light and EM, 426
Glucocorticoid induction of tyrosine hydroxylase, rat pheochromocytoma cells, biochemistry, R1
Glutamine synthetase, turtle retina glial (Müller) cells, biochemistry, 675
Glycoprotein, major, fibroblast cell surface, localization, redistribution, and role in cell shape, biochemistry and immunofluorescence and phase contrast microscopy, 520
Granules, protein, and storage proteins, silkmoth fat body, biochemistry and light and EM, 823
Grey snapper *Lutjanus griseus*, retina, thin (actin) and thick (myosinlike) filaments in cone contraction, EM, 227
Growth cones, adrenergic vesicles in, rat sympathetic neurons, EM, R8
–, Vero cells, patterns of peptide synthesis during, biochemistry and cytology, R28
Grunt *Haemulon sciurus*, retina, microtubules in cone myoid elongation, EM, 247
– *Haemulon sciurus*, retina, thin (actin) and thick (myosinlike) filaments in cone contractions, EM, 227
Guinea pig, pancreas, redistribution of exocrine proteins during tissue homogenization, biochemistry, 110

H

Haemulon sciurus, retina, microtubules in cone myoid elongation, EM, 247
– *sciurus*, retina, thin (actin) and thick (myosinlike) filaments in cone contraction, EM, 227
Histone localization, polytene chromosomes, *Chironomus thummi* salivary glands, immunofluorescence, 910
hnRNP fibers, chromatin-depleted nuclei, HeLa S3 cells, autoradiography and biochemistry and EM, 663
Hormone, insulin inhibition of autophagic vacuole formation, rat liver, light and EM, 152
Host-pathogen interactions, plants, antibiotic production in response to fungal oligosaccharides, review article, 627
Human, brain, adrenoleukodystrophy, glial filaments, biochemistry and immunology and light and EM, 426
–, polymorphonuclear leukocytes, lysosomal enzymes, microfilaments and microtubules in calcium ionophore-induced secretion of, biochemistry and EM, 769
Hyalophora cecropia, fat body protein granules and

storage proteins, biochemistry and light and EM, 823
Hypolipidemia, rat renal and hepatic peroxisome response to RMI 14,514, biochemistry and EM, 810

I

Immunospecific markers for high resolution labeling, derivatized silica spheres, biochemistry and EM, 309
Insect *Chironomus thummi*, salivary glands, histone localization in polytene chromosomes, immunofluorescence, 910
– *Drosophila melanogaster*, myoblasts, isolation from primary cultures of embryonic cells, autoradiography and cytology and EM, 856
– *Trichosia pubescens*, salivary gland, chromosomes, induction of gene activity, autoradiography and histology, 1
Insulin inhibition of autophagic vacuole formation, rat liver, light and EM, 152
Ionic interactions between bovine chymotrypsinogen A and chondroitin sulfate, biochemistry, 951

J

Junctions, gap, in vitro formation of, effect of potassium conductance blockers, canine trachea smooth muscle, biochemistry and freeze-fracture EM, 338
–, gap, and ovulation, cumulus-oocyte complex, rat ovarian follicles, biochemistry and physiology and light and freeze-fracture EM, 58
–, gap, rat liver, changes in during regeneration, freeze-fracture EM, 554
–, neuromuscular, locust, synaptic vesicle synthesis, cytochemical EM, 839

K

Kidney, rat, peroxisome response to RMI 14,514, biochemistry and EM, 810
Killifish *Fundulus heteroclitis*, retina, thin (actin) and thick (myosinlike) filaments in cone contraction, EM, 227

L

Laser microbeam study, termite flagellates, rotary motor, EM, 76
Lectin binding sites, localization of in rat liver rough microsomal membranes, biochemistry and cytochemical EM, 874
– and toxin receptors, lymphoma cell line and toxin-resistant variant, cytochemistry and EM, 565
Leukocytes, polymorphonuclear, human, lysosomal enzymes, microfilaments and microtubules in calcium ionophore-induced secretion of, biochemistry and EM, 769
Liposome membranes, sterol-digitonin complexes, biochemistry and freeze-fracture EM, 577
Liver, Fischer 344 rat, effect of sublobular location and animal age on fine structure, stereological light and EM, 319
–, mouse, giant mitochondria, intact and impaled, metabolic viability of, physiology and Nomarski microscopy, 214
–, mouse, giant mitochondria, membrane potentials and resistances, metabolic dependence and effects of valinomycin, physiology and Nomarski microscopy, 199
–, rat, changes in gap junctions during regeneration of, freeze-fracture EM, 554
–, rat, insulin inhibition of autophagic vacuole formation, light and EM, 152
–, rat, lysosome isolation by isopycnic centrifugation in metrizamide gradient, biochemistry and cytochemical EM, 349
–, rat, microsomes, endoplasmic reticulum membranes, biochemistry and cytochemistry and freeze-fracture stereological EM, 289
–, rat, microsomes, localization of cytochrome P450, immuno EM, 503
–, rat, peroxisome response to RMI 14,514, biochemistry and EM, 810
–, rat, rough microsomes, localization of lectin binding sites in membranes, biochemistry and cytochemical EM, 874
–, rat, rough microsomes, transmembrane disposition and characterization of glycoproteins, autoradiography and biochemistry, 894
Locust *Locusta migratoria*, neuromuscular junctions, turnover and biogenesis of synaptic vesicles, cytochemical EM, 839
Loligo pealei, giant nerve fiber, role of subaxolemmal filamentous network in excitability, biochemistry and scanning and transmission EM, 597
Lutjanus griseus, retina, thin (actin) and thick (myosin-like) filaments in cone contraction, EM, 227
Lymphoma variant cell lines, dynamics of toxin and lectin receptors, cytochemistry and EM, 565
Lysosomes, rat liver, isolation by isopycnic centrifugation in metrizamide gradient, biochemistry and cytochemical EM, 349

M

Marginal band system, nucleated erythrocytes, light and EM, 260
Markers, immunospecific, for high resolution labeling, derivatized silica spheres, biochemistry and EM, 309
Maturation promoting factor, control of nuclear membrane breakdown, frog embryo, cytology, R15
Membrane blisters, particle-free, artefacts on glutaraldehyde-fixed chick corneal fibroblasts, freeze-fracture EM, 756
– breakdown, frog embryo nucleus, cytoplasmic control of, cytology, R15
– changes during secretion, rat neurohypophysis,

freeze-fracture EM, 542
Membrane envelope enclosing bacteroids, soybean root nodules, biochemistry and cytochemical EM, 919
– fusion, Sendai virus-induced, chicken erythrocytes, role of calcium, biochemistry and freeze-etch EM, 465
– potentials and resistances, metabolic dependence and effects of valinomycin, mouse giant mitochondria, physiology and Nomarski microscopy, 199
– protein, frog retina outer segment disks, immunocytochemical EM, 415
– protein synthesis, *Zea mays* chloroplasts, biochemistry, 734
– retrieval, synaptic vesicles, rat brain synaptosomes, EM, 685
Membranes, cell and liposome, sterol-digitonin complexes, biochemistry and freeze-fracture EM, 577
–, endoplasmic reticulum, rat liver, localization of cytochrome P450, immuno EM, 503
–, endoplasmic reticulum, rat liver microsomes, biochemistry and cytochemistry and freeze-fracture stereological EM, 289
–, rat liver rough microsomes, glycoprotein characterization, autoradiography and biochemistry, 894
–, rat liver rough microsomes, localization of lectin binding sites, biochemistry and cytochemical EM, 874
Meromyosin, heavy, labeling of intermediate filaments, cultured connective tissue cells, EM, 644
Metrizamide gradient, isopycnic centrifugation, isolation of rat liver lysosomes, biochemistry and cytochemical EM, 349
Microelectrode membrane potentials, mouse giant mitochondria, effects of valinomycin, physiology and Nomarski microscopy, 199
– membrane potential, mouse giant mitochondria, intact and impaled, physiology and Nomarski microscopy, 214
Microfilaments, calcium ionophore-induced secretion of lysosomal enzymes, human polymorphonuclear leukocytes, biochemistry and EM, 769
–, normal and transformed rat kidney cells, autoradiography and biochemistry and EM, 28
Microsomes, rat liver, endoplasmic reticulum membranes, biochemistry and cytochemistry and freeze-fracture stereological EM, 289
–, rat liver, localization of cytochrome P450, immuno EM, 503
–, rough, rat liver, localization of lectin binding sites in membranes, biochemistry and cytochemical EM, 874
–, rough, rat liver, transmembrane disposition and characterization of glycoproteins, autoradiography and biochemistry, 894
Microtubules and actin filament interaction, role of microtubule-associated proteins, biochemistry and EM, 958
–, calcium ionophore-induced secretion of lysosomal enzymes, human polymorphonuclear leukocytes, biochemistry and EM, 769
Microtubules, HeLa cells, in vitro polymerization of, biochemistry and EM, 47
–, marginal band system, nucleated erythrocytes, light and EM, 260
– nucleation in vitro, yeast spindle pole bodies, biochemistry and EM, 401
Mitochondria, giant, intact and impaled, mouse liver, metabolic viability of, physiology and Nomarski microscopy, 214
–, giant, mouse, membrane potentials and resistances, metabolic dependence and effects of valinomycin, physiology and Nomarski microscopy, 199
Mouse, diaphragm, acetylcholine compartments, effects of black widow spider venom, electrical stimulation, and potassium, bioassay and biochemistry and electrophysiology and EM, 716
–, eye, extraocular muscle, acetylcholinesterase distribution, autoradiographic light and EM, 274
–, liver, giant mitochondria, intact and impaled, metabolic viability of, physiology and Nomarski microscopy, 214
–, liver, giant mitochondria, membrane potentials and resistances, metabolic dependence and effects of valinomycin, physiology and Nomarski microscopy, 199
Müller cells, turtle retina, biochemistry, 675
Muscle, extraocular, mouse, acetylcholinesterase distribution, autoradiographic light and EM, 274
–, frog, basal lamina reinnervation, differentiation of regenerating axons at original synaptic sites, light and EM, 176
–, skeletal, frog, excitation-contraction uncoupling, electrophysiology, 782
–, skeletal, rabbit, actin filament and microtubule interaction, role of microtubule-associated proteins, biochemistry and EM, 958
–, smooth, canine trachea, in vitro formation of gap junctions, effect of potassium conductance blockers, biochemistry and freeze-fracture EM, 338
Myoblasts, *Drosophila*, isolation from primary cultures of embryonic cells, autoradiography and cytology and EM, 856
Myosinlike filaments cone contraction, teleost retina, EM, 227

N

Necklace, somatic cilia proximal region, *Paramecium tetraurelia*, freeze-fracture EM, 451
Nerve fiber, giant, squid, role of subaxolemmal filamentous network in excitability, biochemistry and scanning and transmission EM, 597
– fiber and Schwann cell interaction, role of connective tissue, rat sensory ganglia, light and EM, 943
– growth factor requirement for cell survival, PC12 pheochromocytoma cells, cytology, 747
–, peripheral, and spinal cord, rat, neurofilament pro-

teins, biochemistry and immuno EM, 653
Nerve, sciatic, transected, rat, chemical and structural changes of neurofilaments, biochemistry and EM, 369
– terminals (synaptosomes), rat brain, synaptic vesicle membrane retrieval, EM, 685
Neurofilament chemical and structural changes, transected rat sciatic nerve, biochemistry and EM, 369
– protein phosphorylation, squid giant axon, biochemistry, R23
– proteins, rat peripheral nerve and spinal cord, biochemistry and immuno EM, 653
Neurohypophysis, rat, membrane events during secretion, freeze-fracture EM, 542
Neuromuscular junctions, locust, synaptic vesicle synthesis, cytochemical EM, 839
Neurons, sympathetic, rat, adrenergic vesicles in growth cones, EM, R8
Nodules, soybean root, membrane envelope enclosing bacteroids, biochemistry and cytochemical EM, 919
Nuclear polypeptides, cellular distribution of, frog oocytes, role of nuclear envelope, biochemistry and EM, 168
Nucleation of microtubules in vitro, yeast spindle pole bodies, biochemistry and EM, 401
Nucleus, chromatin-depleted, HeLa S3 cells, hnRNP fibers, autoradiography and biochemistry and EM, 663
–, frog embryo, cytoplasmic control of membrane breakdown, cytology, R15

O

Oligosaccharides, fungal, induction of antibiotic production in plants, host-pathogen interactions, review article, 627
Oocyte-cumulus complex, cell communication and ovulation, rat ovarian follicles, biochemistry and physiology and light and freeze-fracture EM, 58
Oocytes, frog, cellular distribution of nuclear polypeptides, role of nuclear envelope, biochemistry and EM, 168
Ovary, rat, follicles, cumulus-oocyte complex, cell-to-cell communication and ovulation, biochemistry and physiology and light and freeze-fracture EM, 58
Ovulation and cell communication, cumulus-oocyte complex, rat ovarian follicles, biochemistry and physiology and light and freeze-fracture EM, 58
Oxygen, cell cycle stages sensitive to, human diploid cells, autoradiography and cytospectrophotometry, 390

P

Pancreas, guinea pig, redistribution of exocrine proteins during tissue homogenization, biochemistry, 110
Paramecium tetraurelia, somatic cilia, ultrastructure of proximal region, freeze-fracture EM, 451
Pathogen-host interactions, plants, antibiotic production in response to fungal oligosaccharides, review article, 627
Peptide synthesis, patterns of during growth, Vero cells, biochemistry and cytology, R28
Peroxisomes, rat kidney and liver, response to RMI 14,514, biochemistry and EM, 810
Pheochromocytoma cells, rat, glucocorticoid induction of tyrosine hydroxylase, biochemistry, R1
– PC12 cells, nerve growth factor requirement for cell survival, cytology, 747
Phosphorylation, protein, squid giant axon neurofilaments, biochemistry, R23
Phytoalexin production, plants, response to fungal oligosaccharides, host-pathogen interactions, review article, 627
Pinosome destruction, piranhalysis, cultured mouse fibroblasts, cytochemical and video light and EM, 480
Piranhalysis, pinosome destruction, cultured mouse fibroblasts, cytochemical and video light and EM, 480
Plant, bran *Phaseolus vulgaris*, potato *Solanum tuberosum*, and soybean, host-pathogen interactions, antibiotic production in response to fungal oligosaccharides, review article, 627
–, maize *Zea mays*, chloroplasts, membrane protein synthesis, biochemistry, 734
Plaques, somatic cilia proximal region, *Paramecium tetraurelia*, freeze-fracture EM, 451
Polymerization, HeLa cells microtubules, biochemistry and EM, 47
Polypeptides, nuclear, cellular distribution of, frog oocytes, role of nuclear envelope, biochemistry and EM, 168
Postsynaptic density, holes in, dog brain, serial sectioning EM, 36
Potassium conductance blockers, effect on in vitro gap junction formation, canine trachea smooth muscle, biochemistry and freeze-fracture EM, 338
–, effect on acetylcholine compartments, mouse diaphragm, bioassay and biochemistry and electrophysiology and EM, 716
Protein content and organization, normal and transformed rat kidney cells, autoradiography and biochemistry and EM, 28
– granules and storage proteins, silkmoth fat body, biochemistry and light and EM, 823
–, LETS, chick embryo fibroblasts, localization, redistribution, and role in cell shape, biochemistry and immunofluorescence and phase contrast microscopy, 520
–, membrane, frog, retina outer segment disks, immunocytochemical EM, 415
– phosphorylation, squid giant axon neurofilaments, biochemistry, R23
– synthesis, control of, *Chlamydomonas reinhardii* flagella, autoradiography and biochemistry, 8
– synthesis, *Zea mays* chloroplast membranes, bio-

chemistry, 734
Protein transport, intracellular, venom gland secretory cells, *Vipera palaestinae*, biochemistry and autoradiographic light and EM, 488
Proteins, eggshell, secretory kinetics, silkmoth follicular cells, biochemistry and autoradiographic light and EM, 131
–, exocrine, guinea pig pancreas, redistribution of during tissue homogenization, biochemistry, 110
–, microtubule-associated, HeLa cells, biochemistry and EM, 47
–, microtubule-associated, role in actin filament-microtubule interaction, biochemistry and EM, 958
–, neurofilament, changes in transected rat sciatic nerve, biochemistry and EM, 369
–, neurofilament, rat peripheral nerve and spinal cord, biochemistry and immuno EM, 653
Protozoan *Paramecium tetraurelia*, somatic cilia, ultrastructure of proximal region, freeze-fracture EM, 451
Pseudemys scripta elegans, retina, glial (Müller) cells, biochemistry, 675

R

Rabbit, skeletal muscle, actin filament and microtubule interaction, role of microtubule-associated proteins, biochemistry and EM, 958
Radioactive label, [^{14}C]biotin, [^{14}C]leucine, [^{3}H]choline, and [^{125}I], rat liver rough microsomal membranes, localization of lectin binding sites, biochemistry and cytochemical EM, 874
– label, [^{14}C]glucose-1-phosphate, [^{45}Ca]calcium and [^{125}I]sodium iodide, role of calcium in Sendai virus-induced membrane fusion, chicken erythrocytes, biochemistry and freeze-etch EM, 465
– label, [^{14}C]leucine, [^{14}C]methionine, and [^{14}C]proline, major fibroblast cell surface glycoprotein, localization and role in cell shape, biochemistry and immunofluorescence and phase contrast microscopy, 520
– label, [^{14}C]leucine and [^{35}S]methionine, membrane envelope enclosing bacteroids, soybean root nodules, biochemistry and cytochemical EM, 919
– label, [^{14}C]proline and [^{3}H]amino acids, fibronectin synthesis, cultured human amniotic fluid, biochemistry and immunology and light and EM, 701
– label, [^{14}C]thymidine, [^{3}H]adenosine, and [^{3}H]uridine, hnRNP fibers in chromatin-depleted nuclei, HeLa S3 cells, autoradiography and biochemistry and EM, 663
– label, [^{14}C or ^{3}H]amino acids, redistribution of exocrine proteins during tissue homogenization, guinea pig pancreas, biochemistry, 110
– label, [^{3}H]colchicine, [^{3}H]thymidine and [^{3}H]tyrosine, tyrosyltubulin ligase and colchicine binding, Chinese hamster cells, biochemistry, 441
– label, [^{3}H]glutamic acid, [^{3}H]tyrosine, and [methyl-^{3}H]choline chloride, turtle retina glial (Müller) cells, biochemistry, 675
Radioactive label, [^{3}H]glycine and [^{3}H]leucine, secretory kinetics during eggshell formation, silkmoth follicular cells, biochemistry and autoradiographic light and EM, 131
– label, [^{3}H]leucine, in vitro formation of gap junctions, effect of potassium conductance blockers, canine trachea smooth muscle, biochemistry and freeze-fracture EM, 338
– label, [^{3}H]leucine, intracellular protein transport, venom gland secretory cells, *Vipera palaestinae*, biochemistry and autoradiographic light and EM, 488
– label, [^{3}H]leucine and [^{125}I]sodium iodide, cellular distribution of nuclear polypeptides, *Xenopus* oocytes, biochemistry and EM, 168
– label, [^{3}H]leucine and [^{125}I]sodium iodide, dynamics of toxin and lectin receptors, lymphoma variants, cytochemistry and EM, 565
– label, [^{3}H]leucine and [^{125}I]tryptic peptides, actin content and organization, normal and transformed rat kidney cells, autoradiography and biochemistry and EM, 28
– label, [^{3}H]thymidine, isolation of *Drosophila* myoblasts from primary cultures of embryonic cells, autoradiography and cytology and EM, 856
– label, [^{3}H]thymidine, oxygen-sensitive stages of cell cycle, human diploid cells, autoradiography and cytospectrophotometry, 390
– label, [^{3}H]tyrosine, glucocorticoid induction of tyrosine hydroxylase, rat pheochromocytoma cells, biochemistry, R1
– label, [^{3}H or ^{32}P]diisopropylfluorophosphate, acetylcholinesterase distribution, mouse extraocular muscle, autoradiographic light and EM, 274
– label, [^{125}I and ^{131}I], transmembrane disposition and characterization of glycoproteins, rat liver rough microsomal membranes, autoradiography and biochemistry, 894
– label, [^{32}P]ATP, neurofilament protein phosphorylation, squid giant axon, biochemistry, R23
– label, [^{35}S]glucoaminoglycan, ionic interactions between bovine chymotrypsinogen A and chondroitin sulfate, biochemistry, 951
– label, [^{35}S]methionine, membrane protein synthesis, *Zea mays* chloroplasts, biochemistry, 734
– label, [^{35}S]methionine, patterns of peptide synthesis during growth, Vero cells, biochemistry and cytology, R28
– label, [^{35}S]sulfuric acid, control of flagella protein synthesis, *Chlamydomonas reinhardii*, autoradiography and biochemistry, 8
Rana pipiens, embryo, cytoplasmic control of nuclear membrane breakdown, cytology, R15
– *pipiens*, muscle, basal lamina reinnervation, differentiation of regenerating axons at original synaptic sites, light and EM, 176
– *pipiens*, skeletal muscle, excitation-contraction uncoupling, electrophysiology, 782
Rat, bone marrow, sialic acid distribution at endocytic

sites of sinusoidal endothelium, cytochemical EM, 379
Rat, brain, synaptic vesicle membrane retrieval in synaptosomes, EM, 685
–, Fischer 344, liver, effect of sublobular location and animal age on fine structure, stereological light and EM, 319
–, liver, changes in gap junctions during regeneration of, freeze-fracture EM, 554
–, liver, insulin inhibition of autophagic vacuole formation, light and EM, 152
–, liver and kidney, peroxisome response to RMI 14,514, biochemistry and EM, 810
–, liver, lysosome isolation by isopycnic centrifugation in metrizamide gradient, biochemistry and cytochemical EM, 349
–, liver, microsomes, endoplasmic reticulum membranes, biochemistry and cytochemistry and freeze-fracture stereological EM, 289
–, liver, microsomes, localization of cytochrome P450, immunoelectron microscopy, 503
–, liver, rough microsomes, localization of lectin binding sites in membranes, biochemistry and cytochemical EM, 874
–, liver, rough microsomes, transmembrane disposition and characterization of glycoproteins, autoradiography and biochemistry, 894
–, neurohypophysis, membrane events during secretion, freeze-fracture EM, 542
–, ovary, follicles, cumulus-oocyte complex, cell-to-cell communication and ovulation, biochemistry and physiology and light and freeze-fracture EM, 58
–, peripheral nerve and spinal cord, neurofilament proteins, biochemistry and immuno EM, 653
–, sciatic nerve, transected, chemical and structural changes of neurofilaments, biochemistry and EM, 369
–, sensory ganglia, connective tissue role in Schwann cell and nerve fiber interaction, light and EM, 943
–, sympathetic neurons, adrenergic vesicles in growth cones, EM, R8
Receptors, lectin and toxin, lymphoma cell line and toxin-resistant variant, cytochemistry and EM, 565
Retina, frog, membrane protein of outer segment disks, immunocytochemical EM, 415
–, teleost, microtubules in cone myoid elongation, EM, 247
–, teleost, thin (actin) and thick (myosinlike) filaments in cone contraction, EM, 227
–, turtle, glial (Müller) cells, biochemistry, 675
Rhizoid wall, fucoidin sulfation, *Fucus* embryos, fluorescence microscopy and immunology, 866
RMI 14,514, hypolipidemic agent, response of rat renal and hepatic peroxisomes to, biochemistry and EM, 810
Rod outer segments, frog, membrane protein, immunocytochemical EM, 415

S

Saccharomyces cerevisiae, spindle pole bodies, in vitro nucleation of microtubules, biochemistry and EM, 401
Salivary glands, *Chironomus thummi*, histone localization in polytene chromosomes, immunofluorescence, 910
– glands, *Trichosia pubescens*, chromosomes, induction of gene activity, autoradiography and histology, 1
Schwann cell and nerve fiber interaction, role of connective tissue, rat sensory ganglia, light and EM, 943
Sialic acid distribution at endocytic sites, sinusoidal endothelium of rat bone marrow, cytochemical EM, 379
Silica spheres, derivatized, immunospecific markers for high resolution labeling, biochemistry and EM, 309
Silkmoth *Antheraea polyphemus*, follicular cells, secretory kinetics during eggshell formation, biochemistry and autoradiographic light and EM, 131
– *Hyalophora cecropia*, fat body protein granules and storage proteins, biochemistry and light and EM, 823
Slime molds *Dictyostelium discoideum* and *D. purpureum*, species-specific cohesion, fluorescence microscopy, 937
Snake *Vipera palaestinae*, venom gland secretory cells, protein transport, biochemistry and autoradiographic light and EM, 488
Soybean, host-pathogen interactions, antibiotic production in response to fungal oligosaccharides, review article, 627
– root nodules, membrane envelope enclosing bacteroids, biochemistry and cytochemical EM, 919
Spinal cord and peripheral nerve, rat, neurofilament proteins, biochemistry and immuno EM, 653
Spindle pole bodies, *Saccharomyces cerevisiae*, in vitro nucleation of microtubules, biochemistry and EM, 401
Squid, giant axon, neurofilament protein phosphorylation, biochemistry, R23
– *Loligo pealei*, giant nerve fiber, role of subaxolemmal filamentous network in excitability, biochemistry and scanning and transmission EM, 597
Storage proteins and protein granules, silkmoth fat body, biochemistry and light and EM, 823
Subaxolemmal filamentous network, role in excitability, squid giant nerve fiber, biochemistry and scanning and transmission EM, 597
Sublobular location and animal age, effect on hepatic fine structure, Fischer 344 rat, stereological light and EM, 319
Sulfation of fucoidin, *Fucus* embryo, localization in rhizoid wall, fluorescence microscopy and immunology, 866
Surface, fibroblast, localization, redistribution, and role in cell shape of major glycoprotein, biochemistry and

immunofluorescence and phase contrast microscopy, 520
Synapse ultrastructure, dog brain, serial sectioning EM, 36
Synaptic sites, differentiation of regenerating axons at, basal lamina reinnervation, frog muscle, light and EM, 176
– vesicle membrane retrieval, rat brain synaptosomes, EM, 685
– vesicle synthesis, locust neuromuscular junctions, cytochemical EM, 839
Synaptosomes, rat brain, synaptic vesicle membrane retrieval, EM, 685

T

Termite *Cryptotermes cavifrons*, flagellates, rotary axostyle, laser microbeam study and EM, 76
Tetraethylammonium, effect on in vitro gap junction formation, canine trachea smooth muscle, biochemistry and freeze-fracture EM, 338
Thylakoid synthesis, *Zea mays* chloroplast membranes, biochemistry, 734
Tissue culture, chick embryo connective tissue cells, heavy meromyosin labeling of intermediate filaments, EM, 644
– culture, Chinese hamster cells, tyrosyltubulin ligase and colchicine binding, biochemistry, 441
– culture, *Drosophila* embryonic cells, myoblast isolation, autoradiography and cytology and EM, 856
– culture, human amniotic fluid, fibronectin synthesis, biochemistry and immunology and light and EM, 701
– culture, PC12 pheochromocytoma cells, nerve growth factor requirement for cell survival, cytology, 747
– culture, rat pheochromocytoma, glucocorticoid induction of tyrosine hydroxylase, biochemistry, R1
– culture, rat sensory ganglia, connective tissue role in Schwann cell and nerve fiber interaction, light and EM, 943
– culture, rat sympathetic neurons, adrenergic vesicles in growth cones, EM, R8
– homogenization, guinea pig pancreas, redistribution of exocrine proteins, biochemistry, 110
Toxin and lectin receptors, lymphoma cell line and toxin-resistant variant, cytochemistry and EM, 565
Trachea, canine, smooth muscle, in vitro formation of gap junctions, effect of potassium conductance blockers, biochemistry and freeze-fracture EM, 338
Trichosia pubescens, salivary gland, chromosomes, induction of gene activity, autoradiography and histology, 1
Tubulin, microtubule-associated, HeLa cells, biochemistry and EM, 47
Turtle *Pseudemys scripta elegans*, retina, glial (Müller) cells, biochemistry, 675
Tyrosine hydroxylase, glucocorticoid induction of, rat pheochromocytoma cells, biochemistry, R1
Tyrosyltubulin ligase and colchicine binding, Chinese hamster cells, biochemistry, 441

V

Vacuole, autophagic, insulin inhibition of formation of, rat liver, light and EM, 152
Valinomycin, effects on membrane potentials and resistances, mouse giant mitochondria, physiology and Nomarski microscopy, 199
Venom, black widow spider, effects on acetylcholine compartments, mouse diaphragm, bioassay and biochemistry and electrophysiology and EM, 716
– gland secretory cells, *Vipera palaestinae*, intracellular protein transport, biochemistry and autoradiographic light and EM, 488
Vertebrates, nonmammalian, nucleated erythrocytes, marginal band system, light and EM, 260
Vesicles, adrenergic, growth cones of rat sympathetic neurons, EM, R8
–, endocytic, sialic acid distribution over, rat bone marrow sinusoidal endothelium, cytochemical EM, 379
–, synaptic, membrane retrieval, rat brain synaptosomes, EM, 685
–, synaptic, synthesis and turnover of, locust neuromuscular junctions, cytochemical EM, 839
Vipera palaestinae, venom gland secretory cells, protein transport, biochemistry and autoradiographic light and EM, 488
Virus, Sendai, induction of membrane fusion, chicken erythrocytes, role of calcium, biochemistry and freeze-etch EM, 465

W

Wallerian degeneration, transected rat sciatic nerve, neurofilament changes, biochemistry and EM, 369

X

Xenopus laevis, embryo, cytoplasmic control of nuclear membrane breakdown, cytology, R15
– *laevis*, oocytes, cellular distribution of nuclear polypeptides, role of nuclear envelope, biochemistry and EM, 168

Y

Yeast *Saccharomyces cerevisiae*, spindle pole bodies, in vitro nucleation of microtubules, biochemistry and EM, 401

Z

Zea mays, chloroplasts, membrane protein synthesis, biochemistry, 734
Zinc iodide-osmium tetroxide reaction, synaptic vesicle synthesis, locust neuromuscular junctions, cytochemical EM, 839
Zymogen granules, molecular aggregation, ionic interactions between bovine chymotrypsinogen A and chondroitin sulfate, biochemistry, 951
